

College Essay Writing Workshops

A three hour intensive college essay writing workshop
A chance to write your story

Your opportunity

The college essay has become a very important part of the college application process, in many instances it now determines whether a student is accepted or not.

What do college admissions officers feel about the college application essay:

“Your essay is your one shot at communicating who you are and why someone should admit you”

“We want essays that come straight from the heart”

To help students write the college essay we created college essay writing workshops

We created specific, targeted exercises and coaching to get the students from an outline to a final draft of their college essay. We develop their skills to the point where they can successfully evaluate their work, which in turn will lead them to submitting essays that stand out from the crowd.

Outline of the workshop:

- Why the college essay is so important
- What college admissions officers are looking for in an essay and topics that work and those that don't
- Questions to guide students in terms of their own story
- Work time on their essay
- Time working through the essay with the advisor in a one on one environment
- *After workshop and reflection time there are two further one hour meetings with the advisor to work on all aspects of the application process related to writing.*

The students work on their college essays for the entire time of the workshop. When the workshop is finished the student has a college essay which will be ready for revising.

Mr. Gervis and his staff are seasoned English and writing teachers. We bring high standards, the commitment to excellence and the ability to guide students to succeed. **We ask the right questions.**

* COST \$350

* Workshops limited to five students per advisor
For dates, times and location
